Alkanna tinctoria
Färber-Alkanna

A close-up photograph of a flowering plant. The image shows numerous white, five-petaled flowers with bright yellow centers. The flowers are scattered throughout a dense, low-lying green foliage. Some flowers are in full bloom, while others are still in bud form. The background is a mix of green leaves and brownish stems, creating a textured, natural setting.

Reseda alba
Weiße Resede

Malva sylvestris subsp. *sylvestris*
Wilde Malve

Cercis siliquastrum
Judasbaum

A close-up photograph of a dense patch of Erigeron karvinskianus. The image shows numerous white daisy-like flowers with bright yellow centers, interspersed with green foliage and some unopened buds. The flowers are in various stages of bloom, and the overall scene is a lush, textured field of these small blossoms.

Erigeron karvinskianus
Karwinsky-Berufkraut

A close-up photograph of a flowering plant. The central focus is a cluster of bright purple, bell-shaped flowers with five petals each. The flowers are attached to a dark, woody stem. Several unopened buds are visible, showing a similar purple hue. The background is a soft-focus mix of green foliage and brownish-orange ground cover. A white rectangular box with black text is positioned in the lower right area of the image.

Legousia hybrida
Kleiner Frauenspiegel

Scandix pecten-veneris
Venuskamm

Isatis tinctoria (Färber-Waid) und *Papaver rhoeas* (Klatsch-Mohn)
bei Alberobello
